MEDICAL INDUSTRY

Regulatory Compliance

- **Lessened Trade Barriers:** By avoiding a formal declaration to CBP, your inventory is not subject to traditional regulatory measures by Government compliance agencies (FDA, USDA, etc.)
- **Flexibility:** FTZs provide an optimized platform for manipulation of in-transit goods, allowing the customization of orders as they are placed (calibrating, labeling, assembling, and more!)
- **Peace of Mind:** As opposed to bonded warehouses, time limits on storage of bonded merchandise don't apply, even if the products are not approved for US consumption
- **Temporary Removals:** Bonded merchandise can be removed temporarily for repair or exhibition

Savings

- Inventory is not subject to duties, tariffs, taxes, nor antidumping duties; unless you sell the product domestically (if applicable)
- You may commingle your inventory, storing both foreign and domestic products in the same location; saving space and money
